Index

3D CompuGauge 286

acceleration (of the joints) 110
acceleration blends 331
acceleration constraint equation 164
accuracy 11, 282
Acma SR400 145, 151, 154, 164, 247, 251, 255, 298, 301, 376
active joint 150
active stiffness 379
adaptive control 368
adaptive feedback linearizing 369
AKR-3000 145, 151, 155, 165
algorithmic singularities 127
angular velocity 28, 87, 196
anthropomorphic shoulder 8
architectures 7
architecture singularity 190
artificial singularities 127
aspect 99
asymptotically stable 435
autonomous calibration 270, 285
autonomous methods 273
avoidable singularities 122, 131
avoiding obstacles 126

bang-bang acceleration 316, 320
Barbalat
    lemma 373, 438
    theorem 438
base dynamic parameters 295
base geometric parameters 266
base inertial parameters 205, 206, 237, 248, 250
base Jacobian matrix 263
base parameters 417
Bennett mechanism 168
Bézier curve 342
bias 294
B-spline 342
Butterworth filter 299

C5 joint 178
CAD 11, 135, 257, 292, 342
calibration index 265
calibration Jacobian matrix 264
calibration methods 270
calibration model 263
camera-type devices 287
Cartesian coordinates 48
Cartesian shoulder 8
CATIA 135
central difference 299
centrifugal torques 194, 228, 244, 245, 298, 303, 355, 384
characteristic polynomial 80, 82
characteristic surfaces 100
Christoffell symbols 194
closed chains 2, 148
closed kinematic chains 242
closed loop robot 417, 420

compensation 279
complex chain robots 162, 248
complex chains 2
compliance center 379
compliance frame 378
compliance selection matrix 386
compliant motion 377
compliant task 378
composite links 229, 431
computation burden 198
computed torque 291
    control 353
condition number 268, 296
configuration space 5
conjugate 444
"constr" function 341
constraint kinematic equations 242
continuous path 342
Coriolis torques 194, 228, 244, 245, 303, 355, 384
Coulomb friction 192, 199
C-surfaces 378
cubic polynomial 316
cubic spline 337, 342
curvilinear abscissa 342
cuspidal robots 98, 100
customized symbolic algorithm 439
customized symbolic model 225
customized symbolic technique 233, 300, 306
cut joints 150
cut-off frequency 301
cyclic behavior 128
cylindrical groove joint 140
cylindrical joint 141
cylindrical shoulder 8

damped least-squares method 123
damped pseudoinverse 123
damping factor 124
decimate 301
decoupled robot 71
decoupling impedance control 382
decoupling nonlinear control 439
degenerated direction 95, 122, 125
degrees of freedom 6
Delta robot 179
Denavit-Hartenberg 36
DGM (direct geometric model) 42, 153, 154, 185, 258, 279
    calibration 285
differential displacement 380
differential model 167
differential rotational vector 29, 380
differential screw 31
differential transformatio matrix 30
differential translational vector 29, 380
direct differential model 85
direct dynamic model 191, 228, 230, 236, 245
direct geometric model (DGM) 35, 42, 153, 154, 185, 258, 279
    calibration 285
direct kinematic model 85, 185
direction cosines 112
    matrix 20, 48
distance measurement 272
dyalitic elimination 80, 403
dynamic accuracy 349, 353
dynamic identification model 300
dynamic impedance 381
dynamic model 191, 291, 315, 371, 383
dynamic modelling 235
dynamic parameters 291, 348, 414

eigenvalues 411
eigenvectors 411
elastic joints 202
elbow singularity 67

end-effector 2
frame 47, 261
velocity 117
endpoint 258
energy equation 307
energy identification model 306
energy model 207
essential parameters 310
Euler
angles 49, 113, 335
parameters 53
exciting trajectory 296
expectation operator 269, 294
exponentially stable 435
extended Jacobian 126
external hybrid control 386, 391
external torques 228

filtered dynamic model 302, 369
"filtfilt" procedure 299
first moments 193
flat system 354
flexible joints 376
flexible robots 2
force ellipsoid 108
friction 199, 355
parameters 291
torque 228

gear transmission ratio 299, 348
generalized differential model 261
generalized inverse 406
generalized Jacobian matrix 261
general robots 80
geometric calibration 283, 417
geometric constraint equations 150, 155
geometric description 149, 181
geometric parameters 37, 146, 258
globally asymptotically stable 435
Gough-Stewart parallel robot 172, 177, 181, 282
gravity torques 194, 228, 244, 245, 298, 303, 355
Greville method 408
grouped parameters 240

half-angle transformation 71
Hamiltonian 306, 360
Hermitian matrix 444
high-pass filter 298
homogeneous coordinates 14
homogeneous solution 129, 407
homogeneous transformation 13
homothetical trajectories 323
hybrid parallel robot 172
hyperstability 445

identifiability 265, 295
identifiable geometric parameters 266, 276
identifiable parameters 205, 295
identification 291
models 293
IGM (inverse geometric model) 57, 71, 155, 183, 258, 279
IKM (inverse kinematic model) 117, 184, 390
impedance control 381
inclinometers 276, 285
inertia matrix 194, 198, 229, 244, 245, 349, 360, 384, 431, 433
inertia tensor 192, 432
internal singularity 169
interpolation function 315
invariant set principle 437
inverse differential model 117, 151, 184, 282
inverse dynamic algorithm 359
inverse dynamic control 353
inverse dynamic model 191, 243, 255, 300
inverse geometric model (IGM) 57, 71, 155, 183, 258, 279
inverse geometric problem 57, 133

inverse kinematic model (IKM) 117, 184, 390
inverse robot 74, 401

Jacobian 202, 380
  matrix 85, 97, 163
  surfaces 98
joint 4
  accelerations 191, 228, 231, 299, 315
  domain 96
  flexibility 202
  limits 129
  mobility 4
  positions 191, 349
  space 5, 35, 97, 313
  stiffness matrix 380
  torques 191, 299, 315, 315
  variables 5
  velocities 105, 117, 191, 298, 315, 349

kinematic constraint equations 162
kinematic model 111–12, 117
kinematic screw 27, 28, 87, 184, 421
kinetic energy 194, 304, 360, 421

Lagrange
  equation 202, 243, 304
  formulation 192, 193, 235
  multiplier 244
Lagrangian 194, 361
La Salle invariance theorem 351, 363, 373, 437
LASERTRACES 287
laser tracking system 287
least-squares 123, 269, 293
left inverse 406
Levenberg-Marquardt 123, 269, 284, 285
linear interpolation 316
linear velocity 28, 87, 196
line contact 139
location 2
  constraint 273
  measurement 278
  representation 111
low-pass Tchebychev filter 301
LVDT 272, 274
Lyapunov
  function 370, 372
  theory 435

manipulability 124, 130
  ellipsoid 106
Mathematica 420
Matlab 420
measurement techniques 285
mechanical impedance 381
minimum description of tasks 134
minimum dynamic parameters 295
minimum traveling time 319
mobile platform 171
motion control 347
MSSM robot 178

Newton-Euler
  algorithm 357, 431
  formulation 192, 219, 236
  inverse 236, 427, 433
Newton-Raphson 57
non-cuspidal robots 100
nonlinear decoupling 369
nonlinear optimization 269
null space 108, 125, 127, 129, 406, 407
number of degrees of freedom 168

observability measure 266, 268
observation matrix 264, 296, 301
off-line identification 292
Olinde-Rodrigues parameters 53
operational space 5
optimization term 129, 407

OPTOTRAC 287
OPTOTRAK 288
orientation equation 78
orientation error 271

parallelogram 160, 249, 250
parallel filtering 301
parallel hybrid position/force control 386
parallel robot 3, 171, 282
passive compliance 378
passive joint 150, 156
passive stiffness 378
passive systems 199, 445–46
passivity 360
path generation 342
Paul method 57
payload 11
PID control 348
Pieper method 57
planar contact 140
planar parallel robots 175
plane constraint 274
point contact 138
point-to-point trajectory 315, 329
Popov inequality 445
position constraint 274
position equation 72
position error 271
positive definite 198, 356, 436
positive semi-definite 436
potential energy 194, 304, 360, 423
power model 308
predictive dynamic control 357
prismatic joint 5
pseudoinverse 112, 122, 128, 268, 269, 284, 294, 407, 411

QR decomposition 206, 266, 293, 413
quaternions 53, 114
quintic polynomial 317

Raghavan-Roth method 57, 80
range space 108, 122
RCC (Remote Compliance Center) 379
recursive computations 219
recursive equations 94
reduced order dynamic model 302
redundancy 6, 68, 122
redundant 6, 67, 134, 408
    robots 6, 95, 126
regional positioning structure 7
Remote Compliance Center (RCC) 379
repeatability 11
resolution 11
resolved acceleration control law 358, 383
revolute joint 4
right inverse 406
robustness 356
RODYM6D 288
Roll-Pitch-Yaw angles 51, 114
rotation group 5
rotor inertia 201, 291

scale factor 279
SCARA 8, 41, 69, 350
screw 27
    notation 27, 230
    transformation matrix 32, 197
sequential identification 298
serial chain 2
serial robots 3, 36, 192, 407
shoulder 7
    singularity 66
simple open chain 2
simulation 228
singular configuration 6, 121, 131, 189, 314, 406
singular value decomposition (SVD) 103, 108, 122, 123
singular values 121, 297

singularities 95, 121, 125
singularity branches 97
skew-symmetric 198, 351, 432
solvable 58
SPACE-1 173
spatial notation 197, 219, 230
spatial parallel 176
spatial velocity 28
spherical joint 72, 142
spherical shoulder 8
spherical wrist 61, 94, 119
SSM robot 177
stability 350, 352
stability analysis 350, 435
stable 435
standard deviation 270, 294
standard inertial parameters 196
Stanford manipulator 8
Stanford robot 276, 278
state equation 229
state space 361, 370
static decoupling control 354
static friction 199
static model 107
Stäubli RX-90 39, 63, 77, 91, 99, 120, 203, 215, 227, 276, 278, 359, 375, 427
Stribeck phenomenon 199
structural identifiability 265
SVD (singular value decomposition) 103, 108, 122, 123, 293, 411
symbolic customized model 45
SYMORO+ 35, 420, 427
tabulation approach 223
task priority 131
task space 5, 35, 95, 313, 335, 342, 352, 358, 439
task space velocity 105
t-connected subspaces 101
theodolite 286
tool frames 47
torque gain 299
tracking control 367
trajectory generation 313
transformation matrix 18, 37, 38, 146, 208
trapeze velocity profile 316, 321
tree structured chain 2
tree structured robot 145, 235, 417, 418, 424, 431
TSSM robot 178, 186
twist 28
variance-covariance matrix 269, 294
velocity ellipsoid 105
velocity-force duality 108
via points 313, 331
virtual work 202
viscous friction 192, 199
weighted pseudoinverse 128
workspace 11, 96, 102, 172
world frame 259
wrench 32, 107, 108, 219
wrist singularity 67
